

1

Bring the water to the boil and pour it into the appropriate DOSING container up to the WHITE mark.

2

Remove the WHITE BREAKFAST sachet from the box and open it. Prepare the supplied mixer after checking that the battery is charged, immerse it in the appropriate DOSING container and turn it on at speed 2 or 3.

3

Pour the contents of the sachet, keeping the mixer running for at least 20 seconds, moving it inside the measuring jug. Check that the product is completely mixed and the consistency is perfectly homogeneous and pour the milk and biscuits into your cup.

1

Bring the water to the boil and pour it into the appropriate DOSING container up to the GREEN mark.

2

Take the GREEN MAIN PLATE sachet from the box and open it. Prepare a spoonful of extra virgin olive oil.

3

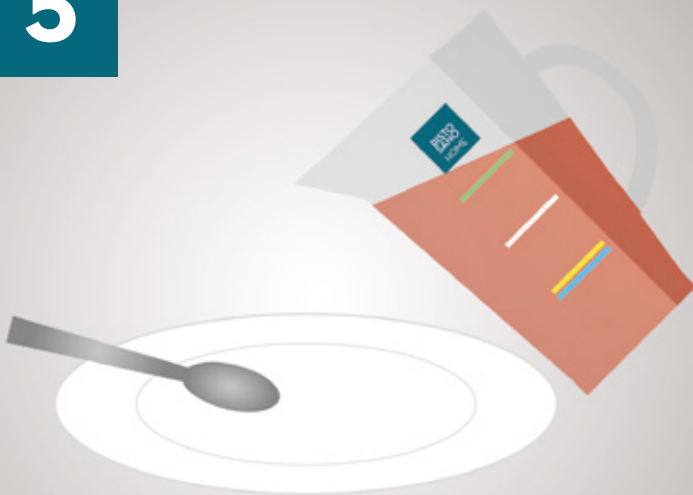

Prepare the supplied mixer after checking that the battery is charged, immerse it in the DOSING container and activate it at speed 2 or 3. Pour the spoonful of oil keeping the mixer running for at least 5 seconds.

4

Immediately pour in the contents of the GREEN sachet, keeping the mixer running for at least 30 seconds and moving it inside the DOSING container.

5

Make sure the product is completely mixed and the consistency of the product is perfectly homogeneous. Pour the dish into the plate.

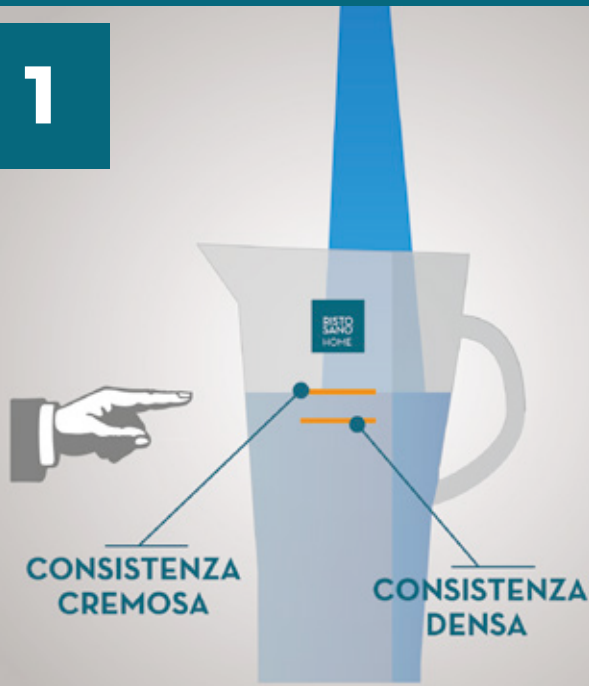

6

To prepare vegetable purees, fruit mousses and desserts, proceed in the same way: measure out the water (YELLOW mark for vegetable puree, for which we remember the teaspoon of oil, and fruit mousse, BLUE for dessert), pour in the contents of the product sachet and mix.

* For desserts and fruit, for optimal consistency, it is best to prepare and store in the refrigerator to consume during the day or the following day.

1

Pour cold or room temperature water into the specific BEVOGEL DISPENSER jug (characterized by two ORANGE lines) up to the mark corresponding to the appropriate consistency: DENSE (water up to the FIRST mark from the bottom) or CREAMY (water up to the SECOND mark).

2

Take the BEVOGEL sachet (ORANGE color) from the case and open it. Prepare the supplied mixer, check that the battery is charged, immerse it in the measuring jug and turn it on at speed 2 or 3.

3

Pour the contents of the ORANGE sachet, keeping the mixer running for at least 20 seconds and moving it inside the measuring jug. Check that the product is perfectly mixed and the drink is homogeneous. Place the measuring jug in the refrigerator to consume the gelled drink throughout the day.
